1.1.1 Share with impress dialog 3
2 Numeric property adjustment 4
3 Improved automatic project saving 4

1 Epic: impress supports PBOX files

1.1 Article information and PIM

impress now supports PBOX files. Article information and PIM data can be shared directly from pCon.box and accessed within impress. Users can easily view this information by clicking the info hotspots in impress.

1.1.1 Share with impress dialog

The “Share with impress” dialog in pCon.box has been updated to include date validity, an “Include article information” checkbox, and a clickable QR code. When the “Include article information” checkbox is selected, article information and PIM data will be available in impress after sharing.

2 Numeric property adjustment

A +/- button has been implemented in the mobile app to allow users to adjust an article's numeric properties (such as height, length, or breadth) in defined step sizes.

3 Improved automatic project saving

To prevent information loss in certain scenarios, project saving has been improved. As part of this change, the temporal project has been removed, and all new projects are now saved automatically.
