1 The new pCon Community approach - Unified access to pCon Data

The pCon Community centralizes access to pCon services and manufacturer data within **pCon.catalog** as unified online portal, simplifying how users discover, access, and use brand content. It provides a structured workspace that connects planners and manufacturers along defined project workflows.

Manufacturer data is now fully integrated and consistently available across all pCon platforms, regardless of whether it is based on OFML or public data. This ensures standardized data availability, cross-platform visibility and seamless integration within the entire pCon ecosystem.

B2B catalogs are based on OFML data. The products from this data can be viewed in all versions of pCon.planner web and configured with prices. The only requirement is that you have the appropriate data access rights in your pCon.login.
